

## Description

Lexan Soft Lite LCS100 sheet is a diffused corrugated panel (color number WH9D464X) utilizing advanced polymer technology to scatter light while maintaining high levels of light. This diffusion feature is an excellent candidate for Greenhouse applications, where plants benefit from high levels of light for growth, but need protection from harsh intense sunlight. The scattering of light also improves exposure of low plants and leaves to light, reducing shadows and improving overall plant growth and uniformity.

Lexan Soft Lite LCS100 sheet offers additional features of long term weathering (UV protection), excellent impact resistance, and a ten year limited written warranty.
